15:00 - 17:00	<i>Practical 7</i> Collateral Ligament Repair and TTA or CCR

EXCLUSIVE LEARNING OPPORTUNITY

Tibial Tuberosity Advancement is the technique choice worldwide for many veterinarians treating cruciate disease in medium and larger dogs. Providing a modern approach to cruciate disease will increase practice profits and maximise patient health. Develop skills in this workshop that are immediately applicable to general practice. If you value the return on your CE investments then this is the course for you!

VetPrac is providing Australian Veterinarians with an exclusive opportunity to develop and practice modern and established techniques in cruciate repair. With unprecedented access to elite surgical training equipment, you will have the chance to practice techniques, advance your skills and help your patients better than before. Classes are intimate, providing the ideal environment for building confidence in your techniques. There will also be an advanced workshop for practitioners already doing TTA.

ADVANCED CLASS

Veterinarians already doing TTA will benefit from this small weekend workshop. A review of the methods and individual critique of technique will build on your current methods and reduce complications. Other procedures and implant types are also discussed. Contact VetPrac for a detailed day schedule.

PRESENTERS

Speaker

DR RAY RUDD

DVM, MS, DACVS

Dr. Ray Rudd, a specialist in veterinary surgery, graduated from the University of Tennessee College of Veterinary Medicine and completed an internship and surgical residency at the Purdue University School of Veterinary Medicine. His past experiences include teaching at Kansas State University College of Veterinary Medicine, owning a small animal surgery referral practice in Riverdale, Georgia, and research and development roles in Cincinnati, Ohio. He has authored over 20 papers in refereed journals. Dr. Rudd is active in the Georgia Veterinary Medical Association. In 2007 Ray joined the United States Army Reserve. He served in Kandahar, Afghanistan in 2011 on a 12-month deployment. He now lives in Peachtree City, GA, with his wife and his wife's five cats. He has four children.

DR SARAH WEBB

BVSc FANZCVS

Sarah graduated from the University of Qld in 1976. She returned to the university to do an internship in the small animal clinic before joining the Department of Small Animal Surgery as a registrar. Sarah now runs Veterinary Specialists Canberra. She was a member of the consultative committee for establishment of the veterinary school at Charles Sturt University. Sarah has also been an active committee member of the Small Animal Surgery Chapter of the Australian and New Zealand College of Veterinary Scientists. She was awarded the Belle Bruce Reid Medal by the University of Melbourne in 2006 and declares that she cannot see herself slowing down just yet.

DR AARON MOLES

*BVSc BSc(Vet)
MANZCVSc(SAS)
DipECVS*

Aaron graduated from the University of Sydney in 1994 and entered general practice. He became a member of the Australian College in 2005. After 10 years of owning and running his own practice in QLD, Dr Moles became a resident at Murdoch University in 2006 and became a Diplomate of the European College in 2010. Aaron recently opened the Western Australian Veterinary Emergency and Specialty Hospital and is known widely as one of the best educators and most practical surgeons in the country.

DR CHRIS TAN

Senior Registrar in
Small Animal Surgery
*BVSc BSc (Vet)
MANZCVS*

Chris graduated from The University of Sydney in 2000. He had six years experience in general practice as an Associate and Senior Veterinarian before starting at the University Teaching Hospital in Sydney. In 2007 he was admitted as a member of the Australian College of Veterinary Scientists. As a registrar at The University of Sydney, Chris hopes to deliver an improved understanding of the needs of a general practitioner to surgical referral services.
