

Australasian Association of Veterinary Diagnostic Imaging Conference 2014

EDUCATORS:

Dr Richard Woolley

BVetMed DipECVIM-CA (Cardiology) MRCVS

Richard has worked in academia, private practice and lectured extensively. Richard graduated from the RVC London in 2002, passing the North American Veterinary Licensing Examination in the same year. After an internship at the University of Edinburgh, he stayed on to complete a three-year cardiopulmonary residency. Richard passed the first part of the European College of Veterinary Internal Medicine – Companion Animals diploma in 2006 and shortly after also completed externships in the veterinary cardiology departments at Cornell and Florida Universities. Richard has broad interests in cardiology and loves to teach.

Dr Sarah Davies

BVSc, MS, Diplomate ACVR

Sarah, a Diplomate of the American College of Veterinary Radiology is a specialist in diagnostic imaging with the VIA team in Sydney. And has recently done some teaching at The University of Adelaide. Dr Davies has completed an internship at the Adelaide Veterinary Specialist Centre and at The Ohio State University. She was accepted into a 4 year residency training program at the Virginia-Maryland Regional College of Veterinary Medicine, in Blacksburg, Virginia. Sarah has a much loved Labrador and Cavalier King Charles Spaniel.

Dr Richard Churcher

BVSc FACVSc (Internal Medicine)

Richard graduated from the University of Sydney in 1970 and began specialist training in 1994 working at the University of Sydney, the University of Florida, USA and Massey University in New Zealand. He qualified as a specialist in 2000 when he achieved his Fellowship in Canine Internal Medicine. Richard enjoys all aspects of canine and feline internal medicine with clinical interest in cardiology.

Dr Zoe Lenard

BVSc(Hons) FANZCVS(Radiology)

Zoe attended the University of Sydney and obtained a Bachelor of Veterinary Science in 1999. She worked in small animal practice in inner Sydney for 4 years, before moving to Perth, Western Australia. At Murdoch University, Zoe undertook a residency in Diagnostic Imaging (2003-2006) and became a Fellow of the Australian and New Zealand College of Veterinary Scientists in Radiology in 2007. Zoe is a Director of the Veterinary Imaging Centre and Perth Veterinary Specialists, and an adjunct Senior Lecturer at Murdoch University.

Dr Cathy Beck

BVSc(Hons) DipVetClinStud MVS FACVSc (Radiology)

Dr Cathy Beck graduated from the University of Sydney in 1992 and after working for two years in private practice, completed a mixed animal internship at the University of Sydney, Camden where she developed an interest in imaging. Cathy then moved to the University of Melbourne where she gained a Masters of Veterinary Studies and then spent six months at the Ohio State University as Clinical Instructor. Cathy returned to the Melbourne and gained Fellowship of the ACVSc in Radiology in 2002.

Dr Belinda Hopper

BSc, BVMS(Hons), MVS, FANZCVS

Belinda is a veterinary radiologist. She is an enthusiastic and experienced echocardiographer with a particular interest in juvenile and feline echocardiography. Belinda is an examiner and office-bearer for the Radiology Chapter of the Australian College of Veterinary Scientists and a committee member of AAVDI. She now holds an adjunct Senior Lecturer position at Murdoch University and is an associate veterinary radiologist at the Veterinary Imaging Centre in Perth.

Dr Benjamin Wernham

BVSc MANZCVS (Radiology)

Ben graduated from Massey University, New Zealand, in 2006. He then completed a primarily surgical internship at The Veterinary Specialist Group in Auckland. He was subsequently accepted into a rotating internship at Kansas State University in 2007. Upon its completion, Ben spent a year at the Comparative Pain and Research Laboratory at North Carolina State University. Ben commenced his position as a resident in Diagnostic Imaging in 2013 at the University of Melbourne

Dr Mariano Makara

DVM Dip ECVDI

Dr Makara earned his veterinary degree at the University of La Plata, Argentina. In 2005, he began a radiology internship with Ross University, under Dr. Joe Morgan. He then moved to the University of Zurich in Switzerland where he completed a residency program in diagnostic imaging and passed his certification exams for the European College of Veterinary Diagnostic Imaging in March 2010. And became Assistant Professor at the University of Zurich. Since January 2011 he has served as an Associate Professor at St. Georges University. And he has completed research projects in thoracic computed tomography angiography contrast medium injection technique and use in diagnosis of infections with Angiostrongylus vasorum in dogs.

And more...

LOCATION: Australian Museum, 6 College St, Sydney, Elizabeth St Entrance

DATE: November 1–2nd, 2014

PRICE: Saturday Only: \$540* Sunday Only: \$400*
Saturday and Sunday: \$790* – Includes Saturday night dinner

*Excluding GST

CPD VALUE: 12 CE points

If you use X-ray or ultrasound in practice and see patients with cardiothoracic disease then this 2 day conference focusing on diagnostics will help you. With the latest information and the most practical tips, you can improve your clinical diagnostic skills quickly. Specialists and special interest vets will brush shoulders with general practitioners to share ideas in imaging this November.

DAY SCHEDULE

	TIME	TOPIC	SPEAKER
DAY 1 : SATURDAY	8:00	Myxomatous valvular disease in dogs - update.	R Woolley
	8:30	Radiographic cardiomegaly - the difference between dogs and cats	Resident
	9:00	Cardiogenic pulmonary oedema - dogs vs cats	C Beck
	9:30	Coughing and cardiac disease: pithy insights into what we should consider when presented with a coughing dog.	R Woolley
	10:15	Morning tea	
	10:45	What a practitioner should be able to do with in-house echo	R Woolley
	11:15	Case studies in congenital disease: which cases should I refer? (options for coils, stents, balloon valvuloplasty etc)	R Woolley
	12:00	Lunch	
	1:01	The cat's heart: review of feline cardiomyopathy. Update on echocardiographic diagnosis of feline cardiomyopathy, including diastology.	R Woolley
	2:00	Diagnostic dilemmas in canine cardiomyopathy from a cardiologist's perspective:	R Woolley
	3:00	Afternoon tea	
	3:30	Tricuspid valve dysplasias in Golden Retrievers - an update	B Hopper
	4:00	Advanced echo techniques: what's new and what's indicated (tissue Doppler, speckle studies, annulus studies)	R Woolley
	4:45	Resident research updates	
	5:30	Close	
DAY 2 : SUNDAY	9:00	10 things you didn't know your digital could do	S Davies
	9:30	Non-cardiogenic coughing: why you still need to XR the thorax	Z Lenard
	10:15	Morning tea	
	10:45	Pulmonary hypertension - clinical presentation, diagnostics and therapeutic options for an insidious disease	R Churcher
	11:30	Pericardial effusions - diagnostics and drainage techniques	B Hopper
	12:00	Lunch	
	1:00	Acute fulminant congestive heart failure - treatment options and diagnostic plan	R Churcher
	1:30	Case studies with panel discussion - cardiac cases (all modalities)	M Makara
	15:00	Conference end
