

# Anxiety and Behaviour Boost for Vets and Senior Trainers

We all want to do what's best for our patients, but with consults waiting and bosses' expectations high, it can sometimes feel overwhelming to think about the complexities of a behaviour consult or how the animals we treat are feeling. Ideally, we all want to work in a low-stress environment, and our patients benefit from coming into a low-stress handling clinic. Can you identify the high stress situations for animals?

Can you identify the problem behaviours vs anxiety animals? And if so, do you have a plan to manage it? Or do you do what's common - ignore it, press on and expect it to be just as bad if not worse, at the next visit? This practical meeting, gives you an alternative option. Recognise your patients' needs, create something different and offer something better to build a more successful practice. Open to Vets and Senior Nurses - Book Now!

## LOCATION

Novotel Hotel - Brisbane Airport, QLD

The Novotel is an easy 5min drive from the airport making it accessible to local and distant attendees. With comfortable and reasonably priced accommodation this is a nice spot for us to get together and discuss some challenges for practical behavioural medicine practices.

## EDUCATION TEAM

- Dr Tracey Henderson  
BSc BVMS MACVSc  
(Veterinary Behaviour)
- Tracy Bache  
Cert IV Companion Animal Training
